The month of April is Distracted Driving Awareness Month

At any given moment across America, approximately 660,000 drivers are using or manipulating electronic devices while driving, a number that has held steady since 2010. Distracted driving has become a deadly epidemic on America’s roadways. The only thing a driver should be doing behind the wheel is driving. Anything that takes your attention away from driving can be a distraction. Sending a text message, talking on a cell phone, using a navigation system, and eating while driving are a few examples of distracted driving. Any of these distractions can endanger you, your passengers, and others on the road.

There are three main types of distraction:
• Visual: taking your eyes off the road
• Manual: taking your hands off the wheel
• Cognitive: taking your mind off driving

Self-nominations for Leadership are now open

It is hard to believe that two years have gone by since I was appointed chair of Women in Buses. I am so incredibly proud of what Women in Buses and in particular this leadership team has accomplished. This group of women represented all facets of the industry and because of this we were able to increase membership, launch the WIB network and provide educational opportunities and networking throughout the year. In February, we had our highest attended Women in Buses meeting at our 3rd annual Women in Buses Day. I can’t wait to see what the future holds for Women in Buses as our next leadership team is put into action.

Nominations are open April 1-April 30 for the 2023-2025 Leadership Team. Select the link below to review the open positions and nominate yourself for where you feel you can best serve WIB.
