Swedens Climate Goals

Year 2045 – No net emissions of greenhouse gases

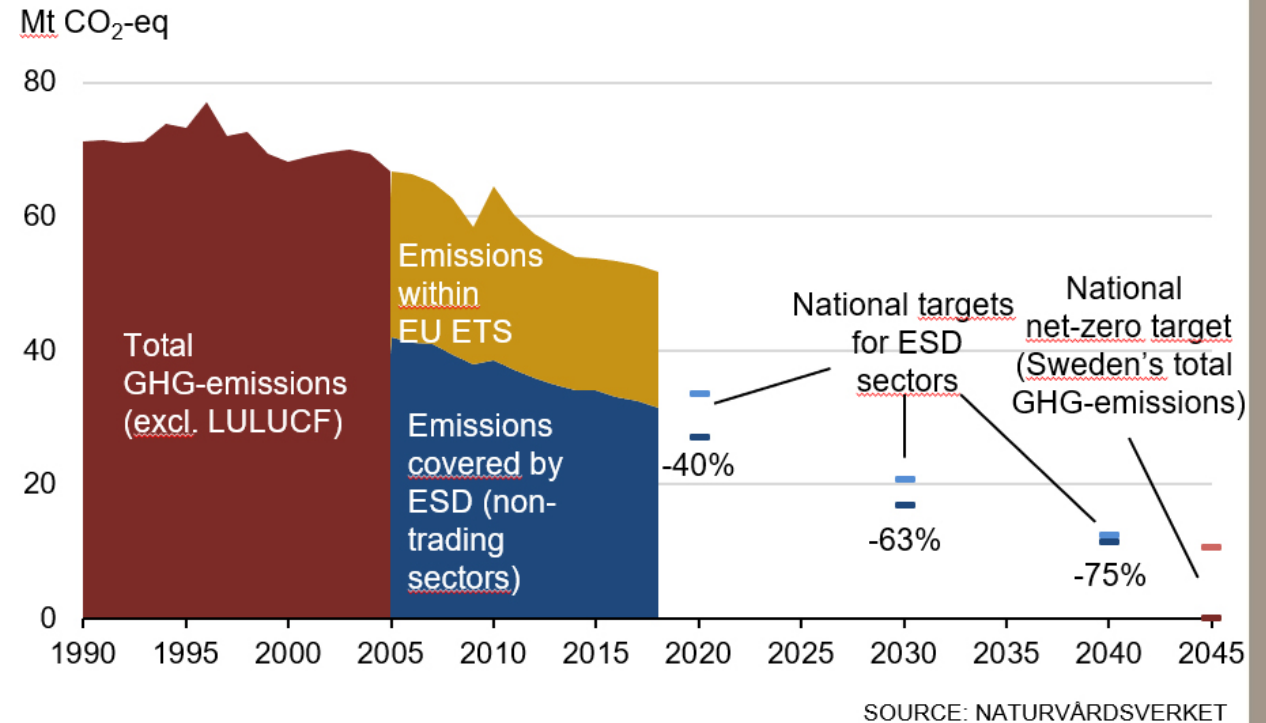

Year 2030 – Fossil independent vehicle fleet

Decided framework with a broad political support

- An ambitious, longterm and stable climate policy
- Climate goals, a "climate law" and a board to evaluate climate policies

"Klimatklivet" - One of the most important initiatives:

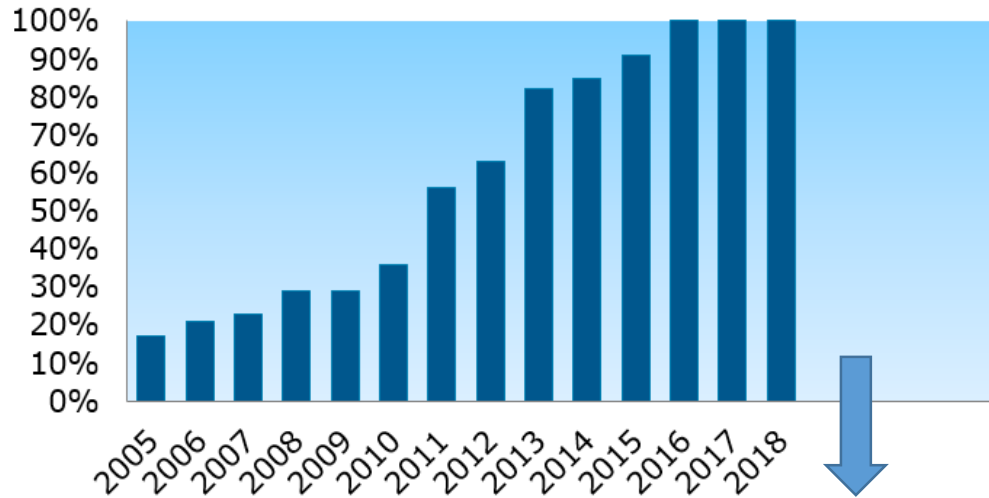

- Climate investments made by companies, municipalities, regions and organizations
- Investment decisions evaluated with regards to potential climate benefits

Stockholm

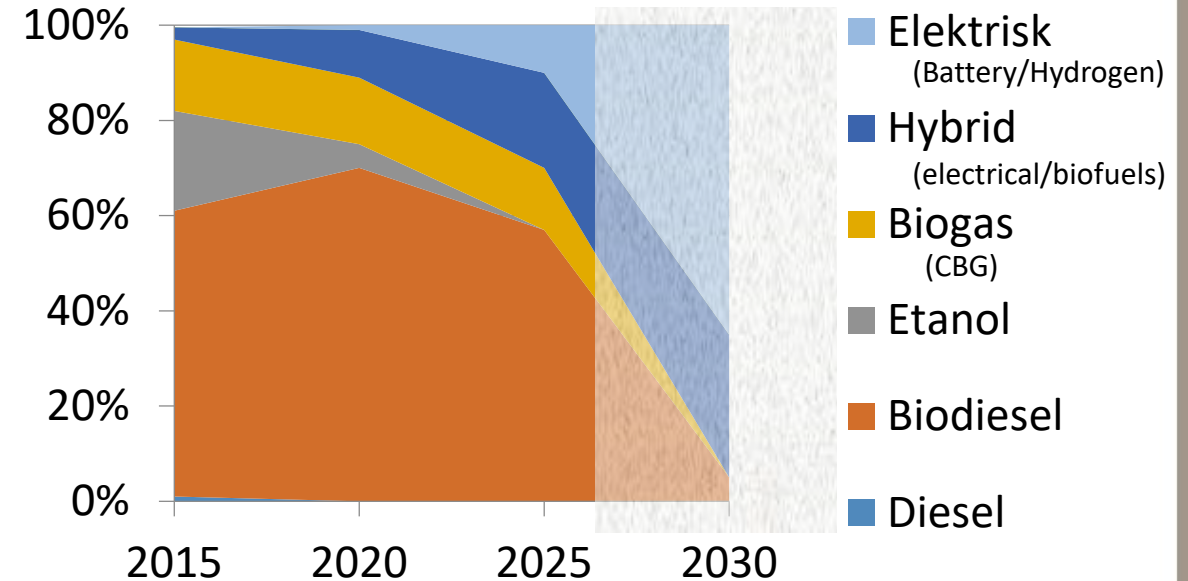

World leader in environment and sustainability

Share of buses running on renewable fuels

Fuels (2019)	Number
HVO/RME	1611
Ethanol	95
Electrical	12
Biogas	336
