Why I love driving

I have been a professional driver since 2005 with DATTCO. I started as a school bus driver. That gave me the opportunity to take my kids with me. It was a big challenge to move from a desk driver to a driver job. After that I became a trainer. In 2014, I became a motorcoach driver and here I am. I am telling you it is like a dream come true because I see a lot of places that I have never expected to see. I love it. It is a big accomplishment for me. I am proud of myself. Some people might think that this is a man's job. I don't think so.

I've logged 2 million miles . One thing about driving a motorcoach is you get to do something different every time, college sports, professional athletics and bands. You get to meet nice people and never know when you will run into someone who has been on your coach.
